pays his own expenses and the com-
pany gains the benefit of their ob-
servations without incurring a cent
of the outlay.

WILL SINK TO 300 FEET ON ARROWHEAD

By an order of Judge R. L. John-
son this morning from San Fran-
cisco, the shaft of the Arrowhead
Mining company will be sunk to a
depth of 300 feet. This action was
taken on the strength of the showing
at the present bottom of the shaft
where the vein has become much
wider than the shaft and the values
are holding up to those found in the
upper levels. The contractors have
finished 40 feet of the 50-foot con-
tract and will be asked to submit
new figures for continuing. A station
will be cut at the second level and
lateral work begun there. Official
reports that the values of ore taken
from above the shaft drift run \$72
in the west, \$167 and one west of
the shaft runs \$74 to \$260. All
ore is being taken out between the
first and second levels. The ship-
ments made to Tonopah average \$75
per ton.

NEW CYANIDE PROCESS FOR TULE CANYON

Five stamps are dropping at the
Ingalls mine in Tule canyon operated
by the Silver Hills Mining company
and another five stamps will be ad-
ded to the equipment. The additional
stamps will be of the heavy Califor-
nia type with a crushing capacity
for seven tons a day. The battery
will be supplemented by a new cy-
anide process with Devereaux agi-
tators which are said to effect a
great saving over the present meth-
od of cyaniding. The primary saving
comes in treating the ore crushed
to a 28 mesh instead of 200 mesh
as required in slinging. This installa-
tion will cost not to exceed \$50,000.
The process is used in connection
with the Loring concentration plant
at Carson Hill. The mill is treating
15 tons a day of \$30 ore but this
will be increased to 50 tons with
the heads raised to \$50. The com-
pany is now employing 26 men and
more will be added as soon as hous-
ing accommodations can be brought
from Goldfield.

Max Herman, president of the Ar-
rowhead Inspiration company is in
Tonopah for the purpose of securing
a complete equipment to place on
shaft No. 2 which will be located
some time soon at a point where
the surface values carry from \$4 to \$7
a ton. Shaft No. 1 is down 45 feet
and the management will crosscut
into the hill at 50 feet while continu-
ing to sink another 50 feet under
contract. The No. 2 shaft will be
within 300 feet of the new road which
will make it easy to deliver the new
plant. The tunnel has been advanced
195 feet and will be carried another
65 feet when drifts will be run to
the shafts under the ledges which
are shown by numerous croppings.
